ABOUT ME

I am a tech-passionate individual who believes that technology can be used to solve problems and increase productivity. I love coding and I have been doing it since my campus days, I now have 3 years of experience in it. I do web applications using PHP and Laravel. I also develop cross-platform mobile applications with React Native. I understand that technology is one of the fields that that keep growing and changing and therefore I am ever prepared to learn new things in tech so as to ensure my skills remain relevant.
